

1. Mark the question that has – wrong – answer

- a) Does the spinal cord pass through medulla oblongata? Answer = Yes
- b) Is the spinal cord covered by meninges? Answer = Yes
- c) What is the shape of denticulate ligaments? Answer = Quadrilateral
- d) What type of tissues are the meningeal membranes? Answer = Connective tissue

2. Mark the question that has – wrong – answer

- a) Which mater of meninges is composed of two layers? Answer = Pia Mater
- b) What is the name of space above dura mater? Answer = Extradural space
- c) Which space contains the Cerebrospinal Fluid in meninges? Answer = subarachnoid space
- d) What is the main function of Cerebrospinal Fluid? Answer= Protection

3. Mark the question that has – wrong – answer

- a) Where does Plexuses arise? Answer = Spinal cord enlargements
- b) What we call the Diagonal branching of spinal nerves after spinal cord tapers down? Answer = Filum Terminale
- c) Is the vertebral column longer than spinal cord in adults? Answer = Yes
- d) Does the spinal cord move and grow in length? Answer = No

4. Mark the question that has – wrong – answer

- a) Which horn of grey matter of spinal cord contains motor cell bodies? Answer = Anterior horn
- b) Which part of grey matter of spinal cord contains the Central Canal? Answer = intermediate mass
- c) Which root of spinal cord is sensory? Answer = Dorsal Root
- d) Which region of spinal cord does not contain lateral horn? Answer = Thoracic

5. Mark the question that has – wrong – answer

- a) Which division of a spinal nerve supply the meninges? Answer = Meningeal branch
- b) Which ramus of spinal nerves tend to make plexuses? Answer = Dorsal ramus
- c) Which nerve supplies the major muscle of respiration? Answer = Phrenic nerve
- d) Do thoracic spinal nerves form a plexus? Answer = N

6. Mark the question that has – wrong – answer

- a) Which plexus supply structures of the head? Answer = Cervical Plexus
- b) Which plexus supply structures of the upper limb? Answer = Brachial Plexus
- c) Which nerve supplies muscles of anterior thigh? Answer = Genitofemoral Nerve
- d) What is the largest nerve in the body? Answer = Sciatic nerve
